KBR Government Solutions U.S.: Marine Corps' Prepositioning (MCPP) Program

The Marines Corps' Prepositioning Program (MCPP) provides maintenance and logistics services for critical ground combat vehicles and support equipment for the Marines. In our overseas operations, we provide forward logistics support to the USMC in support of contingency operations and sustainment operations within the Middle East theater of operations. We also provide subject matter experts in the logistics arena to provide expertise, flexibility, increased velocity, and capacity to ensure continued success for the Marine Corps. KBR Government Solutions U.S. has worked hand in hand with the Marine Corps, building the program and establishing a track record unparalleled in attainment, timeliness, and combat readiness.
